liver, A. B., M. D.....315

Tuberculosis of the Female Gen-
itals. By J. W. James, M. D..318

ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

FIRST NUMBER JUST ISSUED

Medical Clinics of Chicago

These bi-monthly publications are devoted exclusively to *Clinical Internal Medicine* in all its departments, including Diseases of Children, Neurology, Contagious Diseases, Dermatology, X-ray Therapy, etc. They contain the amphitheater and bedside Clinics of many of the leading teachers of medicine in Chicago, stenographically reported by a corps of competent medical stenographers and thoroughly edited by the clinical teachers themselves. The widest variety of cases is included, bringing out forcibly every feature of history-taking, diagnosis, treatment and general management. The cases are illustrated with x-ray pictures, photographs, pulse-tracings, and temperature charts; the technic of all laboratory tests is given in detail, and every aid that can serve to make the diagnosis and treatment of the cases thoroughly clear to the general practitioner is emphasized.
